

MOHAMMED TAHMID HOSSAIN

AI Data Quality Specialist • LLM Evaluator • Machine Learning Researcher

saditahmid.ts@gmail.com • +1 (347) 652-8389 • New York, USA • [linkedin.com/in/saditahmid](https://www.linkedin.com/in/saditahmid) • [saditahmid.github.io](https://github.com/saditahmid)

PROFESSIONAL SUMMARY

Data Specialist and QA professional with 2+ years of experience collecting, organizing, analyzing, and managing data across AI training workflows and quality assurance initiatives. Skilled in rubric-based QA evaluation, compliance documentation, regulatory recordkeeping, and trend analysis using AI-supported systems and electronic databases. Proven ability to maintain data integrity, identify quality issues, and support compliance readiness in regulated environments. Proficient in Microsoft Excel, SharePoint, cloud platforms, and data reporting tools.

WORK EXPERIENCE

Research Assistant (Remote) | Center for Computational & Data Sciences Jan 2024 – Present
Dhaka, Bangladesh

- Conducted applied research on IoMT cybersecurity, developing machine learning classifiers with information-gain feature selection to detect and categorize cyberattacks on Internet of Medical Things devices; published at IEEE ASET 2024.
- Led computer vision research evaluating YOLOv8, YOLOv10, and YOLOv12 object detection models on the Poribohon-BD vehicle dataset under resolution scaling, JPEG compression, and Real-ESRGAN restoration; published at IEEE SCORed 2025.
- Collaborated with multidisciplinary research teams, contributing to data preprocessing, model training, experimental analysis, and academic manuscript preparation.

QA – Senior AI Data Trainer | Invisible Technologies Inc. Sep 2024 – Sep 2025
San Francisco, CA

- Cleaned, optimized, and quality-checked 10,000+ multimodal data samples (text, image, and instruction) to improve LLM training performance.
- Performed rubric-based QA evaluation of LLM outputs for accuracy, relevance, safety, and instruction-following; documented findings to support compliance and quality improvement initiatives.
- Mentored and onboarded new AI trainers through calibration reviews, structured feedback, and quality guidance, improving team consistency.
- Authored requirement and process documentation using Google Docs to standardize annotation and QA workflows across the team.
- Tracked quality metrics and reviewer feedback using Microsoft Excel and Google Sheets, developing reports and tracking tools to identify trends, monitor outcomes, and support data-driven quality improvement.

AI Data Trainer | Outlier AI Mar 2024 – Aug 2024
Oakland, CA

- Created and evaluated multilingual (Bengali–English) prompts and responses to improve LLM accuracy, fluency, and cultural alignment.
- Conducted QA reviews of prompt–response pairs, identifying factual, linguistic, and instruction-following issues.
- Logged annotation outcomes and reviewer feedback in Google Sheets to support iterative model improvement.

Teaching Assistant (TA) | Independent University, Bangladesh Feb 2021 – Aug 2022
Dhaka, Bangladesh

- Mentored 200+ undergraduate students in programming and data structures, supporting coursework in algorithms and software development.

EDUCATION

M.S. Computer Science – Big Data Systems

Arizona State University

Expected 2027

Tempe, AZ

B.S. Computer Science

Independent University, Bangladesh

Graduated 2025

Dhaka, Bangladesh

Relevant Coursework: Machine Learning, Cloud Computing, Data Mining

OTHER EXPERIENCE

Residential Associate | Constructive Partnership Unlimited

Present

New York, NY

- Maintained compliance documentation and regulatory records in a regulated residential environment, ensuring accuracy and adherence to agency policies and applicable standards.

SELECTED PROJECTS

Student Performance Monitoring System

- Built a cloud-based web application using Node.js (Express) and SQLite to track and analyze academic performance at Independent University, Bangladesh.
- Enabled faculty to monitor student progress efficiently with real-time data views. — github.com/saditahmid/SPM_Advanced

AQI Exploratory Data Analysis

- Analyzed Bangladesh's Air Quality Index (2014–2023) across 8 major locations using Python to study the environmental impact of COVID-19 lockdowns.
- Visualized environmental trends to support data-driven policy discussions. — saditahmid.github.io

SKILLS

Data & AI: Multimodal annotation, LLM evaluation, rubric-based QA, data validation, RLHF

Prompt Engineering: Instruction design, prompt testing, response evaluation, multilingual prompting

Research: Exploratory Data Analysis (EDA), feature selection, predictive modeling, statistical analysis

Programming: Python, C++, HTML, CSS, JavaScript (Node.js)

Compliance & Regulatory: Regulatory recordkeeping, QA documentation, compliance monitoring, data privacy standards

Tools: Microsoft Excel, Microsoft SharePoint, Google Sheets, Google Docs, Microsoft Word, Git, Jupyter Notebook
