SUMMARY

Data Quality Specialist and AI Researcher with 2+ years of experience in multimodal data annotation, LLM evaluation, and AI training workflows. Published author in international conferences, with applied research in machine learning, environmental analytics, and healthcare cybersecurity. Proven expertise in rubric-based QA, large-scale dataset validation, and mentoring AI trainers using Google Sheets and Google Docs.

WORK EXPERIENCE

QA - Senior AI Data Trainer (Remote)

Invisible Technologies

📅 Sep 2024 – Sep 2025

📍 San Francisco, United States

- Cleaned, optimized, and quality-checked 10K+ multimodal data samples (text, image, and instruction) to improve LLM training performance.
- Performed rubric-based QA evaluation of LLM outputs for accuracy, relevance, safety, and instruction-following.
- Mentored and onboarded new AI trainers through calibration reviews, structured feedback, and quality guidance.
- Authored requirement and process documentation for trainers using Google Docs to standardize annotation and QA workflows.
- Tracked quality metrics and reviewer feedback using Google Sheets, applying research-oriented evaluation methods to analyze model behavior and data quality issues in large-scale LLM training pipelines.

AI Data Trainer (Remote)

Outlier AI

📅 Mar 2024 – Aug 2024

📍 Oakland, United States

- Created and evaluated multilingual (Bengali-English) prompts and responses to improve LLM accuracy, fluency, and cultural alignment.
- Conducted QA reviews of prompt-response pairs, identifying factual, linguistic, and instruction-following issues.
- Logged annotation outcomes and reviewer feedback using Google Sheets to support iterative model improvement.

Intern Cloud Engineer

Inflexionpoint Technologies

📅 Aug 2023 – Oct 2023

📍 Dhaka, Bangladesh

- Built and deployed scalable machine learning pipelines on AWS and Google Cloud using Docker and Kubernetes.

Teaching Assistant

Independent University, Bangladesh

📅 Feb 2021 – Aug 2022

📍 Dhaka, Bangladesh

- Mentored 200+ students in programming and data structures, supporting coursework in algorithms and software development.

EDUCATION

Masters of Computer Science (Big Data Systems)

Arizona State University

📅 May 2026 – Present

📍 Tempe, Arizona

Relevant Coursework: Machine Learning, Data Structures and Algorithms, Cloud Computing

ADDITIONAL EXPERIENCE

Residential Associate (RA)

BHRAGS Alliance Inc.

📅 Nov 2025 – Present

📍 New York, United States

- Supported day-to-day operations in a regulated residential environment while maintaining compliance and documentation standards.

PUBLICATIONS

- *Impact of COVID-19 Lockdowns on Air Quality in Bangladesh: Analysis and AQI Forecasting with Support Vector Regression.*
IEEE INCET 2023, India.
SVR-based AQI forecasting using multi-year environmental data.
- *Understanding the Dynamics of Dengue in Bangladesh: EDA, Climate Correlation, and Predictive Modeling.*
IEEE TENCON 2023, Thailand.
EDA and predictive modeling on health and environmental datasets.
- *Cyberattacks Classification on Internet of Medical Things Using Information Gain Feature Selection and Machine Learning.*
IEEE ASET 2024, UAE.
Machine learning classifiers with information-gain feature selection for IoMT threat detection.
- *Resolution, Compression, and GAN-Enhanced Evaluation of YOLO Models on the Poribohon-BD Vehicle Dataset.*
IEEE SCReD 2025, Malaysia.
Evaluation of YOLOv8, YOLOv10, and YOLOv12 under resolution scaling, JPEG compression, and Real-ESRGAN restoration.

SELECTED PROJECTS

Student Performance Monitoring System

- Developed a cloud-based web-app using **Node.js (Express)** and **SQLite** to monitor student academic performance at Independent University, Bangladesh.
- Enabled faculty to track and analyze performance more efficiently.
- **Project Link:** github.com/saditahmid/SPM_Advanced

AQI Exploratory Data Analysis

- Analyzed Bangladesh's Air Quality Index (2014–2023) using **Python** to study the impact of COVID-19 lockdowns across 8 major locations.
- Visualized environmental trends to support data-driven policy discussions.
- **Project Link:** saditahmid.github.io

SKILLS

- **Data & QA:** Multimodal annotation, LLM evaluation, rubric-based QA, dataset validation
- **Research:** Exploratory Data Analysis, feature selection, predictive modeling
- **Programming:** Python, C++, HTML, CSS
- **Libraries:** NumPy, Pandas, OpenCV, Scikit-learn
- **Cloud:** AWS, GCP, Docker, Kubernetes
- **Tools:** Google Sheets, Google Docs, Git, Linux
