

MOHAMMED TAHMID HOSSAIN

AI Data Quality Specialist • LLM Evaluator • Machine Learning Researcher
saditahmid.ts@gmail.com • +1 (347) 652-8389 • New York, USA • [linkedin.com/in/mohammedtahmidhossain](https://www.linkedin.com/in/mohammedtahmidhossain) • [saditahmid.github.io](https://github.com/saditahmid)

PROFESSIONAL SUMMARY

Data Quality Specialist and AI Researcher with 2+ years of experience in multimodal data annotation, LLM evaluation, and AI training workflows. Published author at IEEE international conferences with applied research in machine learning, environmental analytics, and healthcare cybersecurity. Proven expertise in rubric-based QA, large-scale dataset validation, and mentoring AI trainers. Proficient in Python, cloud platforms (AWS, GCP), and data tools.

WORK EXPERIENCE

QA – Senior AI Data Trainer | Invisible Technologies

Sep 2024 – Sep 2025
San Francisco, CA

- Cleaned, optimized, and quality-checked 10,000+ multimodal data samples (text, image, and instruction) to improve LLM training performance.
- Performed rubric-based QA evaluation of LLM outputs for accuracy, relevance, safety, and instruction-following across large-scale pipelines.
- Mentored and onboarded new AI trainers through calibration reviews, structured feedback, and quality guidance, improving team consistency.
- Authored requirement and process documentation using Google Docs to standardize annotation and QA workflows across the team.
- Tracked quality metrics and reviewer feedback in Google Sheets using research-oriented evaluation methods to identify model behavior trends and data quality issues.

AI Data Trainer | Outlier AI

Mar 2024 – Aug 2024
Oakland, CA

- Created and evaluated multilingual (Bengali–English) prompts and responses to improve LLM accuracy, fluency, and cultural alignment.
- Conducted QA reviews of prompt–response pairs, identifying factual, linguistic, and instruction-following issues.
- Logged annotation outcomes and reviewer feedback in Google Sheets to support iterative model improvement.

Cloud Engineer Intern | Inflexionpoint Technologies

Aug 2023 – Oct 2023
Dhaka, Bangladesh

- Built and deployed scalable machine learning pipelines on AWS and Google Cloud using Docker and Kubernetes.

Teaching Assistant (TA) | Independent University, Bangladesh

Feb 2021 – Aug 2022
Dhaka, Bangladesh

- Mentored 200+ undergraduate students in programming and data structures, supporting coursework in algorithms and software development.

EDUCATION

M.S. Computer Science – Big Data Systems Arizona State University

May 2026 – Present
Tempe, AZ

Relevant Coursework: Machine Learning, Data Structures and Algorithms, Cloud Computing

OTHER EXPERIENCE

Residential Associate | BHRAGS Alliance Inc.

Nov 2025 – Present
New York, NY

- Supported day-to-day operations in a regulated residential environment while maintaining compliance and documentation standards.

SELECTED PROJECTS

Student Performance Monitoring System

- Built a cloud-based web application using Node.js (Express) and SQLite to track and analyze academic performance at Independent University, Bangladesh.
- Enabled faculty to monitor student progress efficiently with real-time data views. — github.com/saditahmid/SPM_Advanced

AQI Exploratory Data Analysis

- Analyzed Bangladesh's Air Quality Index (2014–2023) across 8 major locations using Python to study the environmental impact of COVID-19 lockdowns.
- Visualized environmental trends to support data-driven policy discussions. — saditahmid.github.io

SKILLS

Data & AI: Multimodal annotation, LLM evaluation, rubric-based QA, dataset validation, RLHF, prompt engineering

Research: Exploratory Data Analysis (EDA), feature selection, predictive modeling, statistical analysis

Programming: Python, C++, HTML, CSS, JavaScript (Node.js)

Libraries & Frameworks: NumPy, Pandas, OpenCV, Scikit-learn, Express.js

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker, Kubernetes

Tools: Google Sheets, Google Docs, Git, Linux, Jupyter Notebook
